Heidi,

In reviewing these bids for the new range simulator Laser Shots did not meet the bid specifications. They only offered us a one year warranty instead of the four year warranty that we requested. The GTS200 is not integrated in any LS software. The specified trigger squeeze and grip pressure options are not available. The laser based flashlight uses a filter which is not acceptable in our specifications. The OC training device is non laser based. The laser shots 870 shotgun will not come with peep or ghost ring sights installed on it.

Since Laser Shots was unable to meet several of the specifications that we requested in our bid I recommend that we purchase the AIS system.
